## Notes
- Details on student achievement calculations can be found at [https://dpi.wi.gov/accountability/resources](https://dpi.wi.gov/accountability/resources).
- Student Achievement only includes assessment results for students enrolled for the full academic year (FAY) in the school.
- Points displayed in the tables above are weighted so that larger numbers of students and more recent years contribute more to the score for the Priority Area.

## Questions to consider
- Are more students in the basic or below basic performance level, compared to proficient and advanced?
- Has the percent of students who are proficient and advanced increased, decreased, or stayed the same over the last three years?

School Report Card Detail | 2018-19 | School Growth

School Growth

Total Score: 81.3/100

The following growth scores are derived from a value-added model. Value-added growth estimates how much student scores are expected to change based on the actual growth of similar students. If the student's performance improved more than predicted by the model, we say her school had high value added. That is, the value the school's impact on student learning resulted in higher-than-predicted growth. A value-added score of 3.0 is average.

School Growth Supplemental Data

This table has information about groups of students in this school. Higher value-added means the school's impact is greater for that group than the italicized comparison group (e.g., students with disabilities compared to students without disabilities).

Closing Gaps

Notes - Prior Three Pages

- Details on Closing Gaps calculations can be found at [https://dpi.wi.gov/accountability/resources](https://dpi.wi.gov/accountability/resources).
- Closing Graduation Gaps is based on graduation data from prior years because data from the most recent year are not yet available.
- The points-based proficiency rate is calculated by multiplying the number of students with scores in the advanced category by 1.5, proficient by 1.0, basic by 0.5 and below basic by 0.0.
- The count of students for achievement calculations can be found in the Achievement Priority Area of the Report Card.
- The symbol "!" means that the group's average points-based proficiency rate or graduation rate is at least 0.9 and that the highest points possible have been awarded. This is to ensure that districts with very high achievement or graduation are not penalized with low Closing Gaps scores for small increases in gaps.
- Each student group included in Closing Gaps calculations is compared to its statewide comparison group using the same number of years of data. For example, if three years of data are available to determine the trend for the students with disabilities group, three years of data are included in the statewide comparison group trend for students without disabilities.

About Supergroups

Supergroups are a way to look at closing gaps among groups of students that would ordinarily be too small to include. A supergroup is made up of all the students that belong to any of the following categories:

- “All 3” Supergroup: students with disabilities, economically disadvantaged, and English Learners.
- “SwD-ECD” Supergroup: students with disabilities and economically disadvantaged students.
- “SwD-LEP” Supergroup: students with disabilities and limited English proficient students.
- “ECD-LEP” Supergroup: economically disadvantaged and English Learners.

A supergroup is used to evaluate Closing Gaps only when there are fewer than 20 students in each of the individual groups within the supergroup, but more than 20 students in the supergroup. For example, if a district had fewer than 20 students with disabilities and fewer than 20 economically disadvantaged students, but more than 20 students when those groups are combined, the “SwD-ECD” supergroup would be used to evaluate Closing Gaps. Students are not double-counted in a supergroup. In the example above, an economically disadvantaged student with a disability is only counted once in the supergroup.

Notes
- Details on On-Track and Postsecondary Readiness calculations can be found at [https://dpi.wi.gov/accountability/resources](https://dpi.wi.gov/accountability/resources).
- Third grade English Language Arts and 8th grade Mathematics Scores are determined in the same way as the Student Achievement Priority Area. However, if there are fewer than 20 students in the most recent year, then the most recent two years of data are combined so that the cell size requirement is met.
- Student Achievement only includes assessment results for students enrolled for the full academic year (FAY) in the school.
- Points displayed in the tables above are weighted so that larger numbers of students and more recent years contribute more to the score for the Priority Area.
